CM75

The CM75PH hose cutting machine has been designed to cut up all types of hoses up to 2" diameter 4-spiral hoses.

The 520 mm diameter blade operates at 3000 rpm. The hose is pushed against the blade by a pneumatic cylinder. Piston movement speed can be quickly and easily adjusted to choose optimal cutting speed for each type of hose.

CM91

The Finn-Power CM91 cutting machine is a reliable heavy duty cutting tool that utilises auto-speed function that is electrically controlled.

The external blade diameter measures 650x4 mm while the internal blade measures 42mm.

The blade feed rate can be configured based on the force needed in cutting and the application.
